

Lull

Suspended acoustic screens

Lull acoustic screens allow designers and architects to define different zones within open-plan spaces allowing people choice and flexibility over where they work, depending on the task and their personality style. The screens can be hung easily to ceilings and act as floating room dividers creating small private areas ideal for focused work or small team collaboration.

Features

- ▶ Available in 12mm and 24mm thickness
- ▶ 2400mm x 1200mm per panel
- ▶ Made from 60% recycled PET
- ▶ No formaldehyde binders

CLEANING

- For dust use a vacuum cleaner with a soft brush attachment.
- For light soiling use clean warm water and a sponge to wipe away dirt.
- For medium soiling use an upholstery cleaner on the soiled area then wipe clean using warm water and a sponge.
- For heavy soiling use an upholstery wet and dry vacuum cleaner with upholstery cleaning solution to spray and vacuum the affected area.

NB For all options it is important to test an inconspicuous area first.

GUARANTEES

AllSfär guarantee its products against material or manufacturing faults. At AllSfär's sole discretion, AllSfär will repair or replace with comparable materials any product or component which fails under normal use in a single shift environment as a result of a defect in the materials or workmanship. A five-year manufacturer's guarantee applies to ÖRA wall coverings and DIFFUSE acoustic furniture. AllSfär also offer a two-year guarantee on all moving parts. The full Warranty Policy is available on request from AllSfär Customer Services.

SPECIFICATIONS

Whilst every care is taken to ensure accuracy, all dimensions are approximate and, as a consequence, AllSfär cannot be held responsible for errors. As part of our policy for continued improvement AllSfär reserve the right to make any changes, without notice, to specifications or designs that it considers reasonable. Any such changes will not affect the validity of the contract.
