

MOSS

REVITALISING SPACES USING BIOPHILIC DESIGN

oasis

DETAILS

Moss is prepared in Holland

Moss is suitable for interior use only

Moss is produced according to a protected growth process

Moss has a positive impact on acoustics

Moss does not have to be pruned or watered - although it was a live product at one stage it is now preserved

Moss is guaranteed to be insect-free due to a treatment temperature of less than 56c

Moss may need replenishing if exposed to sunlight for an extended amount of time

Moss must be processed with special Moss-Glue

Moss colour may vary slightly

Moss may contain small pine needles/twigs - this creates a more natural effect

MOSS TYPES

Reindeer Moss

Spring Green, Forest Green & Dark Green

Flat Moss

Ball Moss
